

MATRIX SERVICE COMPANY

Founded in 1984, Matrix Service Company is a top-tier engineering, fabrication, construction, and maintenance company that, through our divisions—Matrix PDM Engineering, Matrix NAC, Matrix Service, and Matrix Applied Technologies—designs, builds, and maintains infrastructure critical to North America's energy and industrial markets, from a complete EPC LNG terminal to the installation of ball mills and everything in between.

Headquartered in Tulsa, Oklahoma, Matrix provides coast-to-coast solutions for its customers, operating from more than 30 regional offices across the U.S. and Canada, as well as in Sydney, Australia, and Seoul, South Korea. To learn more, visit matrixservicecompany.com.

Across the energy and industrial markets, Matrix designs, builds and maintains the infrastructure that improves quality of life.

MOVE TO A HIGHER STANDARD

MINING & MINERALS CAPABILITIES

Matrix Service Company's mining operations have the industry experience and competency to safely deliver a broad range of projects with high quality and predictable results.

Our regional operations ensure responsive support while leveraging the national presence of our subsidiaries, allowing us to provide scalable solutions and the resources needed to support your projects.
