

# INDUSTRIAL EPC

Worldwide, the industrial landscape is shifting. The North American industry is becoming more competitive thanks to high productivity and less costly, more abundant domestic energy. There are signs that an industrial renaissance is at hand.

Matrix understands the delicate balances involved when making investments in a climate of uncertainty. We are highly relationship-driven and collaborative, working with you to find the right fit of service and job management to deliver the best value.

**For us, safety is more than a core value.  
It's a way of life. We are all accountable  
- safety is first and foremost in all we do.**

**A HIGHER STANDARD IN SERVICES**

# A DEPENDABLE PARTNER IN-TUNE WITH YOUR NEEDS

Matrix divisions are strategically located and structured to help us better serve industries across most of North America. Shared resources such as engineering and central fabrication facilities allow us to work more cost-effectively while maintaining close industry ties everywhere we operate. You get the best of both worlds – a local presence, backed by the strength of a leading national company.

We are more versatile than many industry providers, with the ability to handle a broader range of project requirements. That means less need to deal with multiple providers – you get a single trusted relationship that minimizes overhead, complexity, and risk. Our comprehensive portfolio includes:

## Fabrication and Construction

- Turnkey projects
- Civil, concrete and earthwork
- Fabrication – steel plate, vessel, and piping
- Installation – mechanical, equipment and piping
- Material handling
- Erection
- Rigging & heavy lift engineering
- Code welding
- Plant construction and modification
- Scrubber and precipitator projects
- Tanks, stacks, stack liners, air inlets/outlets
- Storage: including aboveground storage, specialty vessels, dike, and tank liners

## Specialized Engineering Support

- Project engineering
- Design and analysis of turnkey facilities
- Detailed drafting for erection and fabrication
- QA/QC support • Document control • Testing
- Engineering support for FEED studies and conceptual engineering
- Design of specialized erection equipment
- Fitness for service evaluations

## Startup, Commissioning, Shutdown and Turnaround

- Planning, scheduling, and cost control
- ASME Code work
- Industrial cleaning
- QA/QC and safety services
- Procurement
- Plant dismantlement, salvage, and relocation
- Subcontractor management
- Staffing for commissioning

## Maintenance and Operational Support

- Environmental services
- Routine facility maintenance
- Preventive and predictive maintenance
- Maintenance and reliability services
- Maintenance planning
- Tank, vessel and boiler repair and maintenance
- Supplemental maintenance
- Emergency response
